

I claim:

1. A container for storing items comprised of a body defining an interior space for storing items, an opening through which the items can be stored in the body and removed therefrom, a closure that having a first open position permitting access to the first interior space and a second closed position closing the second interior space, and a lighter positioned on the container.

2. The container of claim 1 wherein the lighter is located at a first container end and the opening is located at a second container end.

3. The container of claim 2 wherein the opening is closed with a closure element that closes the opening of the container.

4. The container of claim 1 wherein the lighter is located at a first container end and is removable from the body in order to provide access to the opening of the container.

5. The container element of claim 1 wherein the stored item is a pair of eyeglasses.

6. A container for storing items comprised of a body comprised of a first portion and a second portion, wherein the first portion and the second portion are joined together at a hinge, the first portion and second portion defining an interior space for storing items, that, when in the open state, permits access to the interior of the body, and when closed, closes the interior space, and a lighter located on the container.

7. The container of claim 6 wherein the stored item is a pair of eyeglasses.

8. A container for storing items comprised of a body defining an interior space for storing items, an

opening through which the items can be stored in the body and removed therefrom, a closure that having a first open position permitting access to the first interior space and a second closed position closing the second interior space, and a currency converter located on the container.

5 9. The container of claim 8 wherein the opening is closed with a closure element that closes the opening of the container.

10 10. The container of claim 8 wherein the stored item is a pair of eyeglasses.

10 11. A container for storing items comprised of a body comprised of a first portion and a second portion, wherein the first portion and the second portion are joined together at a hinge, the first portion and second portion defining an interior space for storing items, that, when in the open state, permits access to the interior of the body, and when closed, closes the interior space, and a currency converter located on the container.

150 12. The container of claim 11 wherein the stored item is a pair of eyeglasses.

20 13. A container for storing items comprised of a body defining an interior space for storing items, an opening through which the items can be stored in the body and removed therefrom, a closure that having a first open position permitting access to the first interior space and a second closed position closing the second interior space, and a video gaming device located on the container.

20 14. The container of claim 13 wherein the opening is closed with a closure element that closes the opening of the container.

25 15. The container of claim 13 wherein the stored item is a pair of eyeglasses.

16. A container for storing items comprised of a body comprised of a first portion and a second

portion, wherein the first portion and the second portion are joined together at a hinge, the first portion and second portion defining an interior space for storing items, that, when in the open state, permits access to the interior of the body, and when closed, closes the interior space, and a video gaming device located on the container.

5

17. The container of claim 16 wherein the stored item is a pair of eyeglasses.
